

Timmins High Technical Program, 1980's

The Best Technical Programs in the North

Timmins High continued the tradition of teaching excellence in the trades area in the 1980's. Under the direction of Mr. Frank Torlone, Tech Director, (top left) and Mr. Bruno Toffanello, Assistant Tech Director, (left above) the program included such shops as auto mechanics, plumbing, machine shop, wood-working and construction, electricity, drafting and welding.

The reputation and skill level of the tech graduates was well known in the community and these students easily found jobs after graduation.

Guests to the school comment about the unique "shopping mall" design of the technical area, with various shops adjacent to the common work area.
